Fishila Business

This site demonstrates the requested features for evaluation.

Files

- **index.html**: Home *(hero, cards, parallax, plugins section)*
- **about.html**: About *(figures, captions)*
- **services.html**: Services *(cards + special table view between 880 - 1099px)*
- **gallery.html**: Gallery with manual carousel *(no autoplay)*
- **css/style.css**: Shared styles *(responsive + sticky footer via flex layout)*
- **js/script.js**: Shared JavaScript *(menu, carousel, year, validation, a11y toggle)*

Validation

Semantic HTML5 used, alt text on images, labelled controls, no inline event handlers, ARIA used where appropriate. Third-party iframes may produce warnings; core markup validates.

Responsiveness

- **Mobile**: single-column grid
- **Tablet** (≥ 772px): two columns
- **Large** (≥ 1100px): three columns
- **Third layout**: 880 - 1099px "table view" on **services.html** switches cards to a data table

Styling

Modern, consistent design with gradients, shadows, hover/focus states, and parallax accent. > 9 unique CSS rules.

Images

Images used with descriptive alt text. Gallery carousel uses random images that I have on my device.

Enhancements (at least 4)

1. **Custom JS**: manual, accessible carousel (keyboard support; no autoplay).

2. **Form validation** with DOM feedback and ARIA.

3. **Accessibility improvements**: skip link, focus-visible outlines, ARIA roles, reduced-motion respect, a11y boost toggle.

4. **Plugins**: Google Map (customized params & lazy) + Google Calendar (agenda mode, params changed).

5. **Sticky footer** implemented with flex layout.

6. **Third viewport layout** (unique table view range).
